

# How to use TASSOMAI .com

The Learning Program

Tassomai.com is a website which can be accessed via any computer, tablet or phone with internet connection.

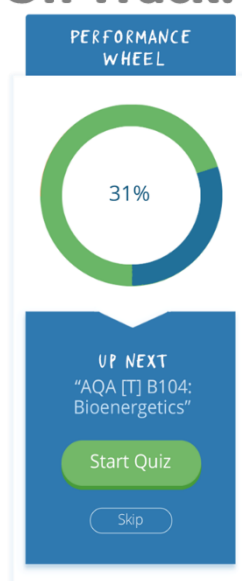

Students can login using their school email e.g. [..12x-student-a@chesterfieldhigh.co.uk](mailto:..12x-student-a@chesterfieldhigh.co.uk)

Students should have set their password to “password”. If a password is forgotten it can be reset by a member of the science faculty. We also allow students to access Tassomai at lunch or after school.

Tassomai contains multiple choice exam questions which help ensure students can recall the vast quantity of content in GCSE Science. Tassomai will generate individual tests for each individual student. If a student is struggling it will give a greater quantity of easier questions in a topic to build confidence. As a student begins to understand a topic Tassomai adjust to ask harder questions.

When students log in they will see their progress wheel:

## On Track:

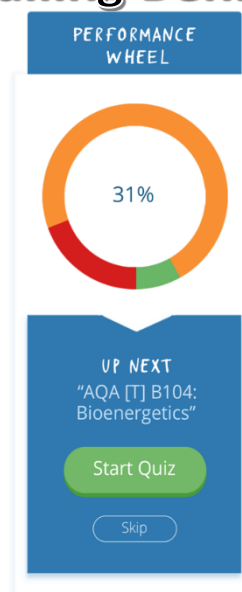

Green and blue means the student is on track to complete the course and is therefore likely to achieve well in science

Red and orange means the student is falling behind and at the current rate will not complete the course

Tassomai will automatically assign the next quiz when you press the start quiz button. Each quiz is individual to the student

## Falling Behind:

**“A few minutes each day will keep the red wheel at bay!”**

Tassomai usage will be monitored and students will be set a C3 detention if they fall behind. It should be a short activity done daily rather than a weekly slog.

Tassomai has been proven to raise achievement in science both nationally and at Chesterfield.

In 2016 95% of users that regularly used Tassomai secured a C-grade (New grade 4) and 51% of pupils who regularly used it achieved A/A\* grades (New grades 7/8/9).
